THE SIXTH SUSTAINABILITY REPORT HAS BEEN PUBLISHED

Bologna, 11 May 2026 - On today's date, the Board of Directors of **Valsoia S.p.A. (EXM: VLS)** met and it approved the additional periodic information as of March 31, 2026.

Chairman Lorenzo Sassoli de Bianchi commented: *"In this first quarter, the Company recorded revenues growth of 2.2%, confirming the strength of our Brands in the food sector. We are particularly pleased with the performance in foreign markets, which continue to grow at a rate of more than 20% on a like-for-like basis, with positive results in all the countries where we operate. This performance does not yet include the contribution of the recent acquisition of Krepko, the Slovenian leader in the kefir market, which nevertheless recorded growth during the period.*

Sales in Italy, however, are stable, in a more complex environment characterized by declining consumer confidence and inflation concerns. In this context, we have decisively continued to invest in communications and consumer marketing, as well as in innovation projects not limited to products, always with the goal of strengthening the value of our Brands and the solidity of our Company. We will continue along this path in the coming quarters, while maintaining careful cost management.

The expansion of the Serravalle Sesia plant is progressing according to plan, with production expected to begin in the second half of the year and full operation by early 2027. This is a strategic investment that will strengthen our efficiency, flexibility, and capacity for innovation.

Profitability remains a key focus, in a still uncertain national and international context: we will continue to monitor the evolution of the scenario, ready to take all necessary actions to protect the Company's profitability.

Finally, we published the sixth edition of our sustainability report, which confirms our commitment to responsible growth, with particular attention to the development of our people and talents, a key element for the future of the Company".

¹ The first quarter of 2026 represents the first reporting period in which the Company approved additional periodic information on a consolidated basis, following the acquisition of 70% of the share capital of the Slovenian company Kele&Kele d.o.o., which took place in December 2025. For this reason, consolidated economic data are not compared with the same period of the previous financial year.
